Exp:5 Develop a Customized ping 01/08/26

AIM:

To develop a customized ping command in python. & a server by sending ICMP echo request packets.

WORKING PROCEDURE:

1. Install python & vs code
2. Create a python file named ping.py
3. Import required modules
4. Accept hostname or IP address
5. Detect operating system
6. Use ping -n 4 on Windows
7. Execute ping command using subprocess
8. Display the ping output, including reply time.
9. Check return code to determine whether the server is unreachable.
10. Display reachable / unreachable based on result.

St 1: Install python
Verify Istallation

St 2: Install vs code

St 3: Create project folder
CustomizedPing → ping.py

St 4: Write the program

St 5: Execute the code

Python ping.py

St 6: Enter Website

RESULT:

Hence, A customized ping command to test the server connectivity has been developed successfully and verified.
