Exp:07 XML RPC - Calculator 09/09/26

AIM:

To develop a simple XMLRPC - calculator to perform arithmetic operations.

PROCEDURE:

1. Verify python Installation
   python --version
2. Create project folder ; XMLRPC - Calculator with two folders inside server.py and client.py.
3. Write server.py and client.py programs save them inside the created folders.
4. Open two different Cmd prompt & run each folder seperalely.
5. Start XML RPC server, then server.py and client.py in each cmd prompt
6. server.py >> XMLRPC Calculator Server Running on Port 8000...

client.py >> Enter values and derieve Output.

Result:

Hence, the XML RPC Calculator has been successfully implemented & verified.

```
C:\Users\HDC0222007>cd "%USERPROFILE%\Downloads\New folder\XMLRPC_Calculator"

C:\Users\HDC0222007\Downloads\New folder\XMLRPC_Calculator>python client.py
Enter First Number: 4852
Enter Second Number: 468

Select Operation
1. Addition
2. Subtraction
3. Multiplication
4. Division
Enter your choice (1-4): 1
Result = 5320

C:\Users\HDC0222007\Downloads\New folder\XMLRPC_Calculator>python client.py
Enter First Number: 4875
Enter Second Number: 2658

Select Operation
1. Addition
2. Subtraction
3. Multiplication
4. Division
Enter your choice (1-4): 3
Result = 12957750
```

```
7   print("2. Subtraction")
8   print("3. Multiplication")
9   print("4. Division")
10  choice = input("Enter your choice (1-4): ")
11  if choice == '1':
12      print("Result =", server.add(a, b))
13  elif choice == '2':
14      print("Result =", server.subtract(a, b))
15  elif choice == '3':
16      print("Result =", server.multiply(a, b))
17  elif choice == '4':
18      print("Result =", server.divide(a, b))
19  else:
20      print("Invalid Choice")
```

server.py client.py

C: > Users > HDC0222007 > Downloads > New folder > XMLRPC_Calculator > server.py > ...

```
1  from xmlrpc.server import SimpleXMLRPCServer
2  server = SimpleXMLRPCServer(("localhost", 8000))
3  print("XML-RPC Calculator Server Running on Port 8000...")
4  def add(a, b):
5      return a + b
6  def subtract(a, b):
7      return a - b
8  def multiply(a, b):
```

```
Users\HDC0222007>cd "%USERPROFILE%\Downloads\New folder\XMLRPC_Calculator"

Users\HDC0222007\Downloads\New folder\XMLRPC_Calculator>python server.py
-RPC Calculator Server Running on Port 8000...
.0.0.1 - - [10/Sep/2026 08:47:43] "POST /RPC2 HTTP/1.1" 200 -
.0.0.1 - - [10/Sep/2026 08:48:19] "POST /RPC2 HTTP/1.1" 200 -
```
