Exp: 08 Reverse Shell with TCP 17/09/2026

AIM :

To develop a program to create a reverse shell using TCP Socket.

PROCEDURE :

1. Install & verify python downloads.
2. Create a folder Reverse shell with two files server.py & client.py
3. Open vs code, write the program & save as server.py in the Reverse shell folder.
4. And another program and save as client.py in the Reverse shell folder.
5. Now the folder has two files server, client as mentioned before.
6. Open two different Command prompts & run each file separately.
7. Now, transfer messages from both command prompts & verify output.

Result :

Thus, the Reverse shell with TCP socket has been successfully implemented and verified.

server.py client.py

C: > Users > HDC0222007 > Downloads > Experiment 8 > server.py > ...

```python
import socket
SERVER_IP = "127.0.0.1"
PORT = 5000
server = socket.socket(socket.AF_INET, socket.SOCK_STREAM)
server.bind((SERVER_IP, PORT))
server.listen(1)
print("Waiting for client...")
conn, addr = server.accept()
print("Connected by:", addr)
while True:
    message = conn.recv(1024).decode()
    if not message or message.lower() == "exit":
        break
    print("Client:", message)
    response = input("Enter reply: ")
    conn.send(response.encode())
conn.close()
server.close()
print("Connection closed")

```

server.py client.py

C: > Users > HDC0222007 > Downloads > Experiment 8 > client.py > ...

```python
import socket
SERVER_IP = "127.0.0.1"
PORT = 5000
client = socket.socket(socket.AF_INET, socket.SOCK_STREAM)
client.connect((SERVER_IP, PORT))
print("Connected to server")
while True:
    message = input("Enter message: ")
    if message.lower() == "exit":
        break
    client.send(message.encode())
    response = client.recv(1024).decode()
    print("Server:", response)
client.close()
print("Connection closed")

```

```
C:\Users\HDC0222007\Downloads\Experiment 8>python server.py
Waiting for client...
Connected by: ('127.0.0.1', 65500)
Client: helloo!!!
Enter reply: Hiii!!!
```

```
C:\Users\HDC0222007>cd "C:\Users\HDC0222007\Downloads\Experiment 8"

C:\Users\HDC0222007\Downloads\Experiment 8>python client.py
Connected to server
Enter message: helloo!!!
Server: Hiii!!!
Enter message:
```
