Exp:10 Customize Switch with Modules 26/09/2026

AIM:

To Customize a cisco switch by adding or removing network modules with cisco packet tracer.

PROCEDURE:

1. Open Cisco packet tracer
2. Add a Modular switch
3. Open physical view & turn off the switch.
4. Add a network module & power on the switch for booting device
5. Connect two PC to the switch PC0 & PC1 with a copper straight-through
6. After connecting configure each PC's with their IPV4 address & subnet mask.
7. Test for connectivity from PC0 → command prompt → ping 192.168.10.3 & verify output.

RESULT:

Hence, the customized switch with module has been implemented successfully & verified.
