Exp: 12 Live host using Nmap 01/01/2026

AIM:

To discover live hosts using Nmap in Try Hack Me platform.

PROCEDURE:

1. Login to the TryHackMe Website
2. Open the Nmap room & start the target machine.
3. Start Attackbox & open terminal
4. Find target IP Address.
5. perform an ARP scan using nmap -sn -PR <IP>
6. perform ICMP scan with nmap -sn -PE <IP>
7. perform a TCP ping scan with nmap -sn -PS80
8. perform UDP ping with sudo nmap -sn -PU53
9. Observe the output to identify live hosts.

RESULT:

Hence, the discovery of live hosts using Nmap has been verified & successful.

```
$ sudo nmap -sn -PU53,161 10.10.210.15

Starting Nmap
Host 10.10.210.15 is up.
Nmap done: 1 IP address (1 host up) scanned.
```

```
$ sudo nmap -sn -PR 10.10.210.15

Starting Nmap
Host 10.10.210.15 is up.
Nmap done: 1 IP address (1 host up) scanned.
```

```
$ nmap -sn -PE 10.10.210.15

Starting Nmap
Host 10.10.210.15 is up.
Nmap done: 1 IP address (1 host up) scanned.
```

```
$ nmap -sn -PS80,443 10.10.210.15

Starting Nmap
Host 10.10.210.15 is up.
Nmap done: 1 IP address (1 host up) scanned.
```
