Exp: 14 Analyze Network traffic 8/10/2026

AIM:

To capture, save & analyze network traffic of TCP, UDP, IP, HTTP & DNS protocols with wireshark

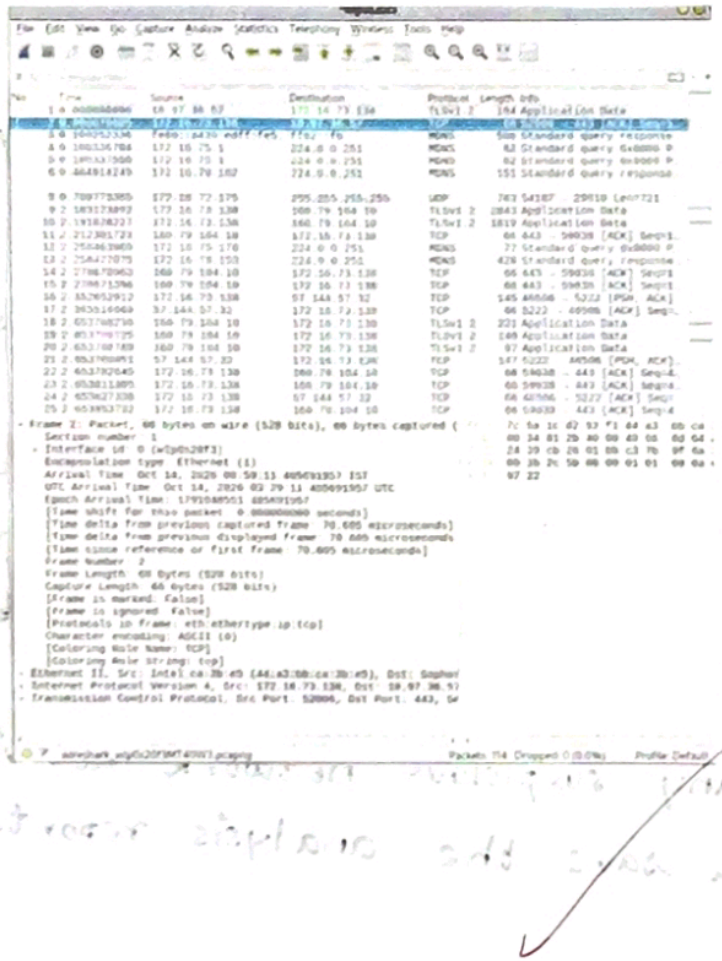

PROCEDURE:

1. Download and install wireshark from official website.
2. Open Wireshark and select the active network interface (Ethernet)
3. Start capturing network packets.
4. Generate network traffic using a browser (or) cmd prompt.
5. Apply display filters like tcp, udp, http, arp and dns to view different protocols.
6. Observe and analyze the captured packets.
7. Stop the capture & save the file in .pcapng format.
8. Examine the packet details.

RESULT:

Thus, the Analyses of Network traffic with wireshark has been successfully implemented.
